

RFID Protect | Product Brochure 2014

## Why choose RFID Protect shielded products?

We offer a wide range of 'anti-skim' products for 'contactless' devices such as e-passports, credit / debit cards and secure entry pass systems.

Our product portfolio has been assembled to cover most requirements and budgets. Working closely with our European-based manufacturer and law enforcement agencies here in the UK, RFID Protect has emerged as a leading resource for European markets in the fight against 'contactless' crime.

As a British-based company we strive to source our products from Europe in the first instance. We have teamed up with a European manufacturer that enables us, and in turn our customers, to support European manufacturing and our domestic economy.

RFID Protect is uniquely positioned to provide custom solutions for our full range of protective sleeves, wallets and badge holders. Should you require a specific size of badge holder, protective sleeve or 'smart card' wallet then just ask and we will look into the associated costs for your project. We can custom print your logo, design or company insignia onto many of our products, but only where orders are for quantities over 1,000 units. Our design team can either work with your artwork or alternatively are happy to assist you with all aspects of the process (subject to quotation) – working towards printer-ready artwork.

Whilst our products are designed specifically to protect 13.56 MHz RFID enabled cards from unauthorised access, they are also ideal for use with many types of similar-sized ID cards (whether 'contactless' or standard). Preventing against accidental activation of access control systems for instance or simply offering general protection against 'wear and tear' are just a few examples of how our products can be used.

**Typical applications include:**

- Access control cards
- Identity badges
- Ski passes
- Travel cards
- VIP/ Backstage passes
- Paddock / pass cards at motor sport events
- Festival event management
- College / school identity pass cards

**Typical client profiles include:**

- Military
- Law enforcement
- Local authorities
- Hospitals
- Sports resorts
- Music festival organisers / venues
- Motor sports teams and event managers
- Corporate marketing
- Airlines / airports
- Travel companies
- Banking / financial institutions

## The possibilities are endless!

As you can see, the possibilities are almost endless. So if you use or distribute identity badges, secure entry pass systems, travel cards or any other type of card using 'contactless' technology then our products are ideal for you.

All of our badge holders can be integrated with a wide range of lanyards, badge reels, strap-clips, and chains, which we are also able to supply. Personalised custom printing is also available on our lanyards and badge reels. As with all custom solutions, we strive for a swift turnaround although this does take longer than supplying our other 'off the shelf' products; therefore we would suggest a six week timeframe (subject to quotation) is typical from the receipt of final artwork to delivery.

We are also more than happy to discuss any badge holder custom manufacturing requirements you may have, and the management of associated intellectual property in the ideas you may like to see realised. We are willing to consider 'non-disclosure' agreements and discuss the possibility of territorial exclusivity and other aspects of licensing practice.

## Tyvek™ RFID secure card e-passport sleeves

### Typical applications include:

- e-passport protection
- e-passport protection in postal system

Standard UK passport size:  
dimensions (approximately 129 x 95 x 0.5mm)

Product code: EPS-11 (13.56 MHz protection)

### Tyvek™ RFID secure all purpose e-passport sleeves

Available in plain or custom printed, these Tyvek™ based passport size protective sleeves are an ideal cost effective solution for use with biometric enabled passports.

A popular use for this product is returning e-passports in the postal system, thus minimising risks of unauthorised scanning whilst inside the postage envelope. Simply slide the e-passport into one of these protective sleeves, then place in your normal postage envelope.

### Custom options:

These e-passport sleeves can be custom printed with your logo or message. Minimum order quantities apply for custom printed sleeves, plain sleeves available in trade packs starting from 100 units.

## Tyvek™ RFID secure card sleeves

### Typical applications include:

- Credit / debit cards
- Travel cards
- ID cards
- Hotel door entry cards
- 'Contactless' access control systems

Standard credit card size:  
dimensions (approximately 90 x 57 x 0.5mm)

Product code: CCS-11 (13.56 MHz protection)

### Tyvek™ RFID secure all purpose card sleeves

Available in plain or custom printed, our Tyvek™ based credit card sized protective sleeves are an ideal cost effective solution for use with the new 'contactless' credit and debit cards, e-travel cards, access control/door entry cards.

These sleeves will fit easily into most wallets, handbags, purses to offer protection from unauthorised access. Ideal for banks and other financial institutions when mailing 'contactless' cards in the postal system.

### Custom options:

These sleeves can be custom printed with your logo or message. Minimum order quantities apply for custom printed sleeves, plain sleeves available in trade packs starting from 100 units.

## Leather RFID secure multi-card holder

### Typical applications include:

- Bank cards / travel passes / ID protection
- Can be used with hotel door entry passes
- 'Contactless' access control systems
- 4 x credit card sized compartments
- inner sleeve compartments lend themselves to numerous storage purposes

Standard UK bank card size dimensions:

Wallet: (approximately 95 x 60 x 7mm)

Gift box: (approximately 110 x 70 x 18mm)

Product code: CCH-12

(13.56 MHz protection)

## Leather RFID secure multi-card holder

When we were asked by law enforcement agencies in Australia to develop a new product for their specific needs we were delighted to help. We can now offer this new product to all our customers, and hope you'll be as excited as we are with this leather multi-card holder.

A high quality leather holder that is available in black and with custom embossing and printing options. This RFID shielding multi-card holder is a stylish solution for use with

any UK sized bank card, ID card or travel pass.

Each holder comes in its own presentation gift box, which can be custom printed\*. As an added extra the holder (whilst closed) also provides protection against unauthorised 'skimming' for up to four contactless cards. This item contains four inner compartments.

### \*Custom options:

Our wallets can be embossed and the gift box custom printed to your requirements. (Minimum order quantities apply.)

## Leather RFID secure e-passport wallet

### Typical applications include:

- e-passport protection
- 4 x credit card sized compartments
- inner sleeve compartments for bills or boarding passes

Standard UK passport size dimensions:

Wallet: (approximately 100 x 140 x 10mm)

Gift box: (approximately 150 x 112 x 20mm)

Product code: BEPW-11 (13.56 MHz protection)

### Leather RFID secure e-passport wallet

A high quality leather passport wallet that is available in black or tan and with custom embossing and printing options\*. This RFID shielding wallet is a stylish solution for use with UK sized biometric enabled passports.

Each wallet comes in its own presentation gift box, which can be custom printed. As an added extra the holder (whilst closed) also provides protection against unauthorised 'skimming' for up to four contactless cards.

This item also contains inner compartments that are ideally suited to taking paper-based currency or boarding passes.

#### \*Custom options:

Our wallets can be embossed and the gift box custom printed to your requirements. (Minimum order quantities apply.)

## RFID Protected | Rigid plastic card holder

### Typical applications include:

- Military
- Access control cards
- Identity badges
- Ski passes
- Travel cards
- VIP / backstage passes
- Paddock / VIP entry control pass cards e.g. motor sport events
- Festivals / event management
- College / school identity pass cards

Badge holder insert size:  
dimensions (approximately 86 x 54mm)

Product code: RAC-5081 (13.56 MHz protection)

### Rigid plastic card holder

This US-manufactured, (but European-supplied), rigid card holder is designed to accept two 'contactless' cards and is ideal where you need to protect cards from bending, dust, dirt and abrasion. The holder has been designed so it can be worn in the vertical or horizontal position, and can take a lanyard (or similar) in these orientations.

To enable the card to be read there is a thumb hole to facilitate pushing the card(s) out of the holder, simply slide card back into holder and return to card protection mode.

If you have a specific requirement we can provide a quotation. Minimum order quantities will apply; lanyards, reels, and clips are sold separately to clients' specifications.

## RFID Protected | Vinyl shielded card protector

### Typical applications include:

- Access control cards
- Identity badges
- Ski passes
- Travel cards
- VIP / backstage passes
- Paddock / VIP entry control pass cards  
e.g. motor sport events
- Festivals / event management
- College / school identity pass cards

Badge holder insert size:  
dimensions (approximately 86 x 54mm)

Product code: VBH-5080 (13.56 MHz protection)

### Vinyl shielded card protector

Our vinyl card protector is manufactured in Europe and has been designed to accommodate two 'contactless' cards. This low-cost solution is ideally suited for most 'contactless' access control cards, credit/debit cards, travel cards, identity cards or similar-sized devices.

The standard holder is designed to be worn in the vertical position. For the card(s) to be 'read' simply flip the holder away from its protective backing shield, and then release it back into position to return to card protection mode.

### Custom options:

These holders can be custom printed with your logo or message. We are also able to manufacture them in different sizes for specific types of applications such as backstage passes, paddock entry at motorsport events, or music festivals. If you have a specific requirement we can provide a quotation. Minimum order quantities will apply; lanyards, reels, and clips are sold separately to clients' specifications.

## Other products...

We are also able to offer a range of quality RFID shielded leather goods too and can provide written quotations on request. If you are looking for a particular product then please do call us.

Are you a budding inventor or design student looking to develop your idea? Because if you have an idea for a solution to protect from RFID theft then we want to hear from you!

Email us at: [info@rfidprotect.co.uk](mailto:info@rfidprotect.co.uk) with your idea, requirements or business proposal.

# 5 things you might like to know about us...

**We're often accused by others of hiding our light under a bushel. So, here are 5 things you might like to know about RFID Protect.**

## **#1 We don't do anything else.**

It's true! As the only dedicated supplier in the United Kingdom for 'anti-skimming' RFID shielding products, you can be sure of a first rate service – because we don't do anything else. We won't try to sell you key fobs, USB sticks or even a free pen for that matter – just simple, effective products that when used correctly will help protect you from contactless crime. It's that simple!

## **#2 We manufacture too.**

It's not just our current range of stock that you might be interested in. With a European manufacturing base there's no limit to the range of bespoke RFID shielding products that we can make for you. Whether you're a large corporation, industrial designer, or an individual working out of a garden shed – don't worry, because we can find solutions to meet your particular needs.

## **#3 An award winning design team at your disposal.**

Products, packaging and print – we do the lot! If you've got a great idea for the 'look and feel' of your product then our in house design team will do the rest – just give us a call to discuss what might be possible. We also retain the services and expertise of an award-winning freelance copywriter with over 3 decades experience working as a senior writer and creative director at top London and International advertising agencies.

## **#4 Traditional customer care in a technological age.**

Yes, it exists even in this technological age! We pride ourselves on providing traditional customer care, and are not satisfied with our service until you are. We don't have an automated phone system with premium tariffs and dozens of menu options – if we're not in the office, then we don't answer calls or emails! (But you might want to drop us a line or leave a message, because we will always get back to you as soon as is possible.) Of course, if you're someone who likes to poke, tweet or just wants to hear our latest news then we'd love you to follow us on Facebook and Twitter.

## **#5 We care about crime reduction.**

With over fourteen years experience in law enforcement and security, we've seen some pretty ingenious crimes in our time. We've also witnessed at first hand the distress caused to victims and remain committed to helping improve things. When we saw the opportunity to combine practical and timely crime reduction information, with a terrific product we just had to do our bit.

**We're aiming to make your contactless experience even more secure. We hope we'll be doing it for a long time to come.**
